Noah Griffin show KYA-KSFO, with Jay David, Gary Shaw

Shaw on Ricky White: says that Larry Howard and he believed that Ricky believed he was telling them truth but not that it necessarily was true. Marine Corp history of father persuaded them. Picture of mother with Ruby and father in police dept also did.

70 Say Ricky knows little of subject, hasn't read any of the books, which is impossible to believe. But they compared with the "facts we have".

95 Shaw says father was "killed in very suspicious industrial accident." They are on subject of pictures Roscoe left. Sdmits Roscoe took them from police. They did not know of backyard photo of LHO until pictures stolen and then retrieved. 1975. Firenf looks Ricky up (Hordan, not named) and tells him there was a second gunman, HSCA is going to say, from knoll and his father. Ricky says he didn't believe this. In 1982, grandfather died, they searched outbuilding, found footlocker, which Ricky took. Found diary in it. Says Ricky read this over period of several years. (Gary Stone also in studio.)

180 Discovered father's involvement in secret actitities. 1985 found two cables with details of involvement in assassination. Shaw delays telling why they did not see diary. Mandarin and two other assassins, Saul on Records bldg, Lebanon in TWBD. Says father escaped in own vehicle "down the embankment" and went to Oak Cliffs for Tippit. Says father a d Tippit searched for Oswald. Made phone call from record story later picked Oswald up. Oswald panicky, jumps from car. Says Tippit becomes suspicious from reports on police radio and tells Rosce they have to go downtown. (215) This is obviously false because the reports on the assassination were on the police radio within seconds, not only after so long a time. Unclear tape but apparently Roscoe then killed Tippit and "that is the one thing he was remorseful about." Four people read portions of diary. aSafe Depmsit key. It had $100,000. He says he went to local DA for help because he had no money. DA chickened out, called FBI, he gave it all and went to hq, grilled. It copied "certain items." Goes home with it all. Says SA Tom Farris returned for notebook left in box. Two days later Ricky discovered diary missing. FBI categorically denies seeing or taking the diary. Shaw doesn't believe FBI.

300 Goes to bank, box, can't get in without probated will, it ends Ricky to FBI and two different agents tell him, kn effect, that the box had been emptied.

330 Rickey searched grandfathers house and found his father's"specific orders." That is when "we decided to have the press conference." Cables with dog tags, etc. Navy intel. cables, 10/63. Shaw reads.

370 "Thise is the real intriguing part. In the diary Roscoe White said that he worked for the RE Rifle Group and donw at the bottom of the vable is "RE Rifle.'" Reads other cabels. They said"CIA came into our exhibit area and this particular cable jumped out at him....because coded somewhere in this message is this contact." Says by decoding they could learn who contact was in Dallas. He says this CIA man "was confirmation." Did he show credentials? This was second cable. third in December, after assassination. Shaw continues to speak of contents of diary as though he'd seen it andsays that in it Roscoe says he was "the principal elimination agent." Roscoe left other information #behind that we'll be making public in the not too distant future." Says 28 people died i "in the tiw witness program," in Roscoe's writing. Which, of course, Shaw didn t see. In-studion vocie says Ricky seems straight. Shaw says "he is not making any money."
380 It is Jerry Stone and Bill of Berkeley on phone.He holds forth on what "we don't hear." Whole list of names. Nutty stuff. Shaw's reponse is that "we believe that it is the most significant case of who pulled the trigger." Hve good leads on who Leabnon was. More jabber, another call Shaw hopes for concrete evidence on whom the bigger people are. Call-ins pretty nutty and irrelevant.

680 Jay begins with questions after talking to me. Although in the Marines Roscoe were a mile apart, Shaw says, they got together because they were "good Texas boys." And he says Roscoe admitted their contact to his wife. Geneva is the world's best witness! On Gary's representation of their common Marine records, which I'm not checking again

and believe is not accurate as he represents their common assignments, he is definitely wrong in saying that they went to Cubi point together because White was in the motor pool in Japan and Oswald went on a carrier as part of Operation Strongback, which I e believe was against Sukarno. He went to Cubi from that assignment. Shaw says that"for about nine months they were at the same place at the same time."Not so. The questons to begin with at least are not the singificant ones on credibility

On who saw the diary, the only ones familiar with Roscoe's hadndwriting are Ricky and his month.

500 In response to question about plagiarizing from three books Shaw begins to reply on McDonald's. "I don't doubt for a minute that Mr. McDonald talked to somebody whi gave him the information. " Then McDonald's credentials. He says that with the book published in 1975 and Roscoe dead in 1972, "that pretty well shoots down" plagiarism. Only if the diary, etc., are authenticated. His whole story depends on Ricky and Geneva, neother a dependable source.

539 On Promises to keep, Shaw can't find anything that duplicates except the existence of a diary. The pojtnwas the accaount of the Tippit killing. He goes into who kept a diary, Sirhan, Bremer, Oswald. Oswald did not keep that kind of diary at all.

Caller asks why the Commission had to seal everything until 2039 if it had nothing to hide and Shaw, described by Griffin as one of premier experts on the assassination, said, "That's an excellent question." The Commission sealed nothing. It turned its records over to the Archives, normal procedure, and what remains withheld is mostly what is called national security and what can hurt people's reputations. He says HSCS did the same thing and again it was the standard proecure under standing regulations.
Shaw is not responsive to the incorrect question on Red Bird aitport and says they've known about strange things going on there for years. But even though the wrong question as asked, Shaw gave no answer to its being cribbed from a book.

925 David goes into the accident in which Whote got fatal burns and the family's suit under hazardous products. Shaw says he doesn't know where I got that information but the DPD files show the cause was a broken acetelyn line. Shaw says the can had been outside and suddenly appeared under Roscoe's work table. He then quotes the alleged deathbed statement to the minister, which has no credibility and the truth is that Roscoe said it was his own, fault, his carelessness. He says I'm in Maryland and know ve y little about it.

980 On cables, don't look real and that would never be put on paper. David gives garbled account of what 'd said about the CIA/mafia plot against astro as this side ends.

Side 2 Dhaw's answ er is that I read William Harvey's ZR Rifle notes. That Harvey made and kept notes has nothing to do with sending messages to another and Harvey should not have done it, according to procedures and practises. A similar thing was done with Nosenko, but he was not a head of state and that was expunged from the broadcast record of HSCA.

On the FBI either keeping the diary under national security claim or would have made a copy and Shaw's answer is wh"What makes Mr. Weisberg an expert on the FBI?" His answer is that the way they did it, which he doesn't question and is only what Ricky said, it has plausible deniability.

I listened until the end of David's questions, until they returned to callers-in and then stopped. This is utter nonsense and David did not understand the questions to ask. He and Griffin were not perceptive ormdiscriminating on the alleged answers.
